

COURSE SPECIFICATIONS

FireWorks

DURATION

2 day

PREREQUISITES

Good Mac or PC skills

OVERVIEW

Fireworks provides the user with the tools to build assets for the web that brings it to life. Animated gifs for advert banners or to add “sparkle” to your pages; image maps to provide “interactive” images that link to other web pages; rollover buttons to introduce highlights when the mouse is rolled over them (the associated Javascript is written for you); and file optimisation to reduce the size of gifs and for general use for the web.

COURSE CONTENT

Image maps

Shapes

Oval

Rectangular

Polygon

Attaching urls

Exporting with HTML

Animated gifs

Building animations with frames

Exporting as animation

Rollover buttons

Building animations with layers and frames
